
SOLANA STARTUP TERMINAL 2.0 · COLOSSEUM 2026
Hintville
A maths game where the AI helper gives hints, never answers.
Playable today

Stuck on 2 + ? = 5?
The AI just gives the answer.

Two plus what makes five? Just tell me!

It’s 3! And here is a poem about the number three...

The child gets the answer. Not the maths.

Why now: California SB 243 (Jan 2026) · 37 states plus Puerto Rico publish AI-literacy guidance for schools. Sources: public reporting; FutureEd state tracker

Real maths. Hints, never answers.

The child solves it

Number planks fix the bridge: 2 + ? = 5.

Ask clearly

A clear question gets a clear hint.

Check the AI

The helper slips on purpose. The child catches it.

Why not ChatGPT?

	Open chatbot	Hintville
Answers	Gives the answer	Gives a hint, the child finishes
"Just tell me!"	Complies	Calms down, gives an easier step

4 weeks. Solo. Playable today.

Web + Android

Public web build and a signed APK for the Solana Seeker phone

1 level live

Fully voiced, captions on, works offline. Two more places on the map

Users: 0 so far

Seeker APK is live (v0.3.1). Next: the first families

Tested by

A startup mentor (2 rounds), the Superteam Ukraine team, my wife

Solana is for the grown-up, never the child

LIVE NOW

Parent wallet sign-in

The child never sees a wallet, a token or the word "crypto".

NEXT, NOT BUILT YET

Learning badges

Each finished level earns a soulbound badge on the parent's wallet. Can't be sold, anyone can verify it. We pay the fees.

$4.99 / month. Kids play free.

Parents

$4.99 / month subscription (price in testing)

Schools

AI-literacy grants

Studios

License it with their own characters

No live AI model: each player costs close to zero to run.

First users from the Solana community

Now

Parents in Superteam, Colosseum and Seeker owners

Next

Parent chats: any parent worried about AI.

2027

Schools: badges become a progress report teachers can trust.

Vision: every kids' app character can be a safe AI teacher.
